The EF Line® range is evolving

The Functional Education & **THE EF LINE® ORTHOPLUS RANGE**

Orthoplus, pioneer & leader
in Functional Education for over 30 years

Orthoplus **supports practitioners** in implementing Functional Education treatments through a **range of devices made in France** and a **dedicated training program**.

Our Goal :

To promote a **holistic and preventive approach** for patient care from an early age.

EF Line®, is a complete range of devices designed
to meet all Functional Education
treatment needs.

From what age can Functional Education be offered ?
From 3 years old

EF Line
by orthoplus®

EF
Specific

Support for fixed appliances

The EF Line® range is evolving
NEW GENERATION OF FUNCTIONAL EDUCATORS

An innovation for practitioners
Tested & Approved :

By an Expert Laboratory :

By an Expert Laboratory:
Ensuring the compliance and safety of our devices.

By our Clients :

Longtime users of our devices, with over 100 patients.

Orthoplus **has partnered with a renowned laboratory** to carry out all mandatory regulatory tests **to ensure the quality and reliability of this new material :**

Physico-chemical characterization | Cytotoxicity | Sensitization
| Irritation | Biocompatibility

Our Goal :

Meeting **regulatory requirements** to provide
the best device for your patients !

For the launch the New
Material is available only
in a transparent version :

EF T Slim & EF T Slim Long

All the range will be available by the end of 2026

The New Material **ADVANTAGES : EVEN MORE EFFICIENT**

The geometry, hardness, flexibility and clinical performance of the device remain unchanged.
Only the material composition evolves.

Crystal Transparency

Even more natural and discreet in the mouth

Inert Material

Tasteless & Odorless, ensuring maximum patient comfort

Medical Grade

Material : Copolymer

Recyclable Material

Eco-friendly approach
(The Eco Be® service is available only in France)

Biocompatible

Validated through regulatory & clinical tests, it ensures increased durability : superior mechanical strength & greater stability

Former food-grade material

New medical-grade material

Eco Be®
THE EXTRA SERVICE

New Partnership

Orthoplus partners with the Eco Be® program :
A **solution for the collection & recycling of medical plastics.**

Since 2022, the **Eco Be® program has been helping clinics** manage their used devices voluntarily, **without affecting clinical performance.**

Collected plastics are sorted, classified & **transformed into new products** : promotional items, furniture, etc.

A service adaptable to your country

Eco Be® is available in France.

For our distributors, we encourage you to explore local recycling programs to offer your patients a responsible solution worldwide.

The **New Material** used in the **EF Line® devices** is **fully recyclable**, as are the **transport boxes** for the Functional Educators.

Simplicity

Time-saving

Eco-Responsibility

Enroll your clinic in an eco-responsible initiative & comply with the 5 stream requirement of a **Corporate Social & Environmental Responsibility (CSR) strategy**

Train with Orthoplus

in Functional Education

A training program tailored
to your level & professional goals

orthoplus.fr

The Functional Education devices from the EF line® range are Class I medical devices with CE marking, intended to be prescribed as part of a comprehensive treatment by practitioners who will determine the indications, wearing times, and associated exercises according to the patient.
